David J. Park

Atlanta, GA 30332 | 678- 627-1508 | dpdavid6276@gmail.com

OBJECTIVE

Driven electrical engineering student at the Georgia Institute of Technology seeking an internship starting May 2027 to leverage hands-on expertise in digital system design, hardware-software integration, and advanced programming.

EDUCATION

Georgia Institute of Technology | Atlanta, GA August 2025 – Present
Bachelor of Science in Electrical Engineering GPA: 3.5
University Of Georgia | Athens,GA August 2024 - May 2025
Bachelor of Science in Engineering GPA:3.8

SKILLS

Software: Python, MATLAB, Java, AutoCAD, Revit
Languages: Korean Native Speaker, English Native Speaker

EXPERIENCE

GT Esports – Varsity League of Legends Team August 2025 – Present

- Selected as the #1 candidate in 2025 tryouts, competing against the full Georgia Tech student body candidate pool.
- Designed and optimized team compositions and matchup strategies for Collegiate League of Legends (CLOL) competition, qualifying for Top 16 playoffs out of 32 teams.
- Helped develop and execute macro-level strategic plans, adapting tactics in real time under high-pressure conditions; tracking patch updates and meta shifts, conducting gameplay analysis, and producing performance reports to enhance team coordination, decision-making, and overall competitive results.

GT KSEA (Korean American Scientists and Engineers Association) August 2025 – Present

- Engaged with a network of 50+ peers to exchange strategic insights, coordinate collaborative initiatives, and strengthen professional relationships.
- Participated in industry-led seminars with professional mentors to gain career guidance, industry perspective, and long-term strategic planning insights.

Danmooji Restaurant December 2023 – August 2024

- Independently managed front-of-house operations in a high-volume, fast-paced environment, delivering seamless service to 30+ concurrent guests while maintaining efficiency and composure under pressure.
- Collaborated directly with management to optimize peak-hour workflows, improving service throughout and sustaining high order accuracy standards.
- Strengthened advanced problem-solving and communication skills by proactively resolving technical and logistical challenges in real time.

RELEVANT COURSEWORK

Digital System Design (ECE 2020): Combinational and sequential logic design, finite state machines, hardware description languages;

Intro to Signal Processing (ECE 2026): Continuous and discrete-time signals, filtering, Fourier analysis, sampling; Linear Algebra; Differential Equations
